

Advanced Ecosystem capabilities with **STUDIUS™ Vault & Remote Viewer**

Build flexibility into your workflow along with faster, more confident and automated decision making

Connect instruments and collect all data in a single shared database

Powerful analysis of all data from any networked PC*

Multiple remote users anywhere to view and analyze data*

STUDIUS Vault

Brings together data from connected instruments securely for fast data access and analysis with over 25 times more storage space than the instrument PC.

STUDIUS Remote Viewer

Enables remote real-time viewing and analysis of all collected data from connected Solentim instruments – from any networked PC.

*High bandwidth connection to the networked Ecosystem required

Expand Ecosystem capabilities with STUDIUS Vault and STUDIUS Remote Viewer

	STUDIUS <i>(Single Instrument Set Up)</i>	STUDIUS + STUDIUS Vault <i>(Single or Multi-Instrument Set Up)</i>	STUDIUS + STUDIUS Vault + STUDIUS Remote Viewer(s) <i>(Single or Multi-Instrument Set up)</i>
Description	STUDIUS is the software interface driving instrument control, data management & analysis for each Solentim Instrument	STUDIUS Vault is an external data management, storage & analysis system enables connectivity between Solentim instruments	STUDIUS Remote Viewer is a version of STUDIUS enabled for remote PC connectivity to access the data management, storage & analysis system of STUDIUS Vault
Data Access	Via STUDIUS PC	Via STUDIUS PC	Via STUDIUS Remote Viewer Via STUDIUS PC
Data Storage Capacity	~2TB per instrument PC	>50TB shared storage spaced	>50TB shared storage spaced
Data Storage Capacity	<ul style="list-style-type: none"> - Instrument control, data access & management is controlled Via STUDIUS on the PC - Solentim instruments with STUDIUS are standalone - Manual data export/import between instruments for analysis & reports is required for combining data 	STUDIUS Vault enables <ol style="list-style-type: none"> 1) Increased data storage for individual & multi-instrument set up 2) Multi instrument connectivity 3) Remote access for individual & multi-instrument set up for combined data, analysis & reporting <i>(Additional licenses may be purchased)</i>	
Remote Data Analysis	No remote access possible to STUDIUS PC	STUDIUS Vault supports STUDIUS Remote Viewer real-time access to data from all networked Instruments	
Multiple User Capabilities	One user at a time via STUDIUS PC	One user at a time per instrument. If multiple instruments available in the Ecosystem, multiple users possible via instrument PC access	Multiple remote viewers can access the software and real-time data simultaneously [^]
Data Integrity & Security	21 CFR part 11 compliant features can be purchased via the optional Continuous Audit Mode (CAM) Application. Customers network and overall IT infrastructure will determine compliance CAM ensures data can only be read & analyzed, not altered, or deleted		

[^] Numerous Instruments running simultaneously and the speed of the customer network may result is slower data viewing times.
